

**George KORMENTZAS** is Vice President of “O.P.E.K.E.PE” in the Hellenic Ministry of Rural Development and Food, and Assistant Professor in the University of the Aegean, Department of Information and Communication Systems Engineering. He was born in Athens, Greece on 1973. He received the Diploma in Electrical and Computer Engineering and the Ph.D. in Computer Science both from the National Technical University of Athens (NTUA), Greece, in 1995 and 2000, respectively. His research interests are in the fields of traffic analysis, network control, resource management and quality of service in broadband networks. He has published extensively in the fields above, in international scientific journals, edited books and conference proceedings. He is a member of pronounced professional societies, an active reviewer and guest editor for several journals and conferences and EU-evaluator for Marie Curie Actions. George Kormentzas has participated in a number of national and international research projects at FP5 (i.e., CREDO) and FP6 (i.e., ENTHRONE) programmes, serving in some instances as the project’s technical representative for University of Aegean and/or as WP leader and/or as the project’s Technical/Project Manager. Currently, he is the project manager of FP7-ICT-HURRICANE project, while he was the technical manager of FP6-IST-STREP UNITE project and co-chair of the FP6 B3GSA cluster.
